William Shi

Student at University of Waterloo | Previous Intern @Alectify Inc. |
Seeking Winter 2027 Internship
Waterloo, Ontario, Canada

Summary

I am a 3rd year Statistics and Computing Minor student from University of Waterloo who has relevant programming experiences(Python, Java, R, C, C++, NextJS, HTML, CSS, SQL, React) through relevant courseworks, Python certification, software developer internship and hackathons. Moreover, I have leveraged AI/ML, data and cloud tools into various web app, such as multimodal LLMs (Gemini, OpenAI, Cohere), vectorDB (chromaDB), noSQL, postgresSQL, PyTorch, RandomForest, TimeSeriesForecast, GCP and Azure. I am looking for AI-full stack developer related jobs.

Experience

Alectify Inc.

AI Backend Engineer

May 2026 - July 2026 (3 months)

Richmond Hill, ON

- Built a training module web using Claude Code, Codex, Django, React, Typescript, Firebase, Docker, AWS S3 to help trainers assign training task to trainee for construction and engineering industry.
- Forecasted danger alert in the construction project via time series machine learning, Celery, Redis on the backend to help constructor and engineer workers to prepare for the danger ahead of time.

Propel Holdings

Software Developer

January 2025 - April 2025 (4 months)

Toronto, ON

- Implemented test cases using JUnit, Springboot and Mockito to increase code coverages to 90% that improves maintainability to the company's website
- Implemented an API using RestAPI, Hibernate and Springboot to improve system performance and agents ability to retrieve data to 100%
- Conducted query testing via SQL to communicate users about update existence of the column in the database

- Use GitHub to submit and approve other people's work and JIRA to update my status

Education

University of Waterloo

· (2023 - 2028)

Alexander Mackenzie High School

High School Diploma, International Baccalaurate · (September 2019 - June 2023)
